Fiscal Year:	FY 2004	**Task Last Updated:**	FY 03/24/2006
PI Name:	Heiser, Laura Ph.D.		
Project Title:	Perceptual Stability Across the Visual Field		
Division Name:	Human Research		
Program/Discipline:	HUMAN RESEARCH		
Program/Discipline--Element/Subdiscipline:	HUMAN RESEARCH--Physiology		
Joint Agency Name:		**TechPort:**	No
Human Research Program Elements:	None		
Human Research Program Risks:	None		
Space Biology Element:	None		
Space Biology Cross-Element Discipline:	None		
Space Biology Special Category:	None		
PI Email:	lmhst47@pitt.edu	**Fax:**	FY
PI Organization Type:	UNIVERSITY	**Phone:**	412-621-2278
Organization Name:	University of Pittsburgh		
PI Address 1:	Neuroscience		
PI Address 2:	446 Crawford Hall		
PI Web Page:			
City:	Pittsburgh	**State:**	PA
Zip Code:	15213	**Congressional District:**	14
Comments:			
Project Type:	Ground	**Solicitation / Funding Source:**	GSRP
Start Date:	07/01/2004	**End Date:**	06/30/2006

Performance Goal No.:			
Performance Goal Text:			
Task Description:	Visual perception is often thought to arise directly from input to the retina. Recent experiments in neurophysiology have revealed that this simple scheme is inaccurate. Instead, the brain constructs an internal representation of visual information that is updated with each eye movement. The integration of motor signals with visual information allows us to perceive the world as stationary despite constant eye movements. The proposed experiments will investigate the neural mechanisms underlying perceptual stability and the degree to which this stability is preserved across the visual field. The results will be significant for understanding normal perception and the ways in which it may be altered in microgravity environments.		
Rationale for HRP Directed Research:			
Research Impact/Earth Benefits:			

Task Progress:	New project for FY2004; no progress report received this period.
