Performance Goal No.:			
Performance Goal Text:			
Task Description:	This project is in support of a workshop entitled "New Directions in Behavioral Health: Integrating Research and Application." The workshop was held on December 2-3, 2003, the University of California, Davis. The purpose of the Workshop was to promote fruitful dialogue between researchers and operational personnel in the interests of expanding our understanding of behavioral health on Exploration missions including a return to the Moon and a voyage to Mars.		
Rationale for HRP Directed Research:			
Research Impact/Earth Benefits:	Research into behavioral health should help trainers, flight surgeons, and other support personnel to prevent or mitigate the accumulation of stresses that could lead to performance lapses and other behavioral issues, whether in space flight or on Earth.		

Task Progress:	The workshop was successful in promoting dialogue between researchers and operational personnel. It culminated in publication of papers from the workshop in a supplement issue of Aviation, Space, and Environmental Medicine.
