Fiscal Year:	FY 2015	**Task Last Updated:**	FY 06/08/2015
PI Name:	Wotring, Virginia Ph.D.		
Project Title:	Monitoring FDA Adverse Event Reports		
Division Name:	Human Research		
Program/Discipline:			
Program/Discipline--Element/Subdiscipline:	HUMAN RESEARCH--Biomedical countermeasures		
Joint Agency Name:		**TechPort:**	No
Human Research Program Elements:	(1) **HHC**:Human Health Countermeasures		
Human Research Program Risks:	None		
Space Biology Element:	None		
Space Biology Cross-Element Discipline:	None		
Space Biology Special Category:	None		
PI Email:	Virginia.Wotring@bcm.edu	**Fax:**	FY
PI Organization Type:	UNIVERSITY	**Phone:**	
Organization Name:	Baylor College of Medicine		
PI Address 1:	Center for Space Medicine		
PI Address 2:	6500 Main St, Suite 910		
PI Web Page:			
City:	Houston	**State:**	TX
Zip Code:	77030	**Congressional District:**	9
Comments:	PI formerly with Universities Space Research Association until fall 2015.		
Project Type:	Ground	**Solicitation / Funding Source:**	Directed Research
Start Date:	09/05/2014	**End Date:**	06/01/2015
No. of Post Docs:	0	**No. of PhD Degrees:**	0
No. of PhD Candidates:	0	**No. of Master' Degrees:**	0
No. of Master's Candidates:	0	**No. of Bachelor's Degrees:**	0
No. of Bachelor's Candidates:	0	**Monitoring Center:**	NASA JSC
Contact Monitor:	Norsk, Peter	**Contact Phone:**	
Contact Email:	Peter.norsk@nasa.gov		
Flight Program:			
Flight Assignment:	NOTE: End date changed to 6/1/2015 per discussion with PI (Ed., 6/7/16)		
Key Personnel Changes/Previous PI:			
COI Name (Institution):			
Grant/Contract No.:	Directed Research		
Performance Goal No.:			
Performance Goal Text:			
Task Description:	All medications carry risks of adverse events (side effects). The Federal Drug Administration (FDA) collects reports of suspected medication-related adverse events and makes the compiled data available to the public on a quarterly basis; the FDA provides no analysis of the data. We propose to systematically examine the FDA data as it is released quarterly for adverse events associated with medications that NASA uses currently or is considering using in the future. This study is not hypothesis driven; it will be an ongoing technical watch designed to ensure that NASA researchers and clinicians are kept informed about emerging risks associated with medications.		

Rationale for HRP Directed Research:	This research is directed because it is a pilot study and contains highly constrained research, which requires focused and constrained data gathering and analysis that is more appropriately obtained through a non-competitive proposal.
Research Impact/Earth Benefits:	
Task Progress:	In the 2014–2015 reporting year, Dr. Wotring performed these analyses and found no unusual trends in reported adverse event for the ISS kit medications. This project was placed on hold 1/1/2015 due to reassignment of staff.
