COI Name (Institution):	Fukuhara, Chiaki (Morehouse School of Medicine)		
Grant/Contract No.:	NCC 9-58-HPF.002.10		
Performance Goal No.:			
Performance Goal Text:			
Task Description:	In this proposal we investigate the effect of long-term exposure to constant dim light on the circadian system of the rat. In particular we are testing the following hypothesis:Do circadian rhythms in the body desynchronize when the animals are maintained in an enviroment without rhythmic cues?		
Rationale for HRP Directed Research:			
Research Impact/Earth Benefits:	The grant investigates the effects that long-term exposre to dim light produces on the circadian organizatio of mammals.		
Task Progress:	No progress report this period.
